Barratt had a vision of creating a place with distinctive character combined with distinguishing features. This is being created by balancing good open space with great sized gardens and lots of usable amenity areas. Visit one of their sites and you will find new homes designed to be bright and airy with great living space for all of your lifestyle needs.

At this site Barratt have been this year concentrating on stage three of work at this development.

The local surroundings offer plenty of countryside to enjoy, lots of farmland and the River Arun for those lazy afternoons. For shopping needs the Broad Piece retail park is only 10 minutes' walk from the development.

A second development from Barratt in this part of the country is Locksbridge Park in Andover which is an impressive new development of 2 bedroom apartments and 2, 3 and 4 bedroom houses located in the beautiful landscape of the Hampshire Downs. People buying a home here will find themselves in a thriving community where they want to live, relax and spend your free time. Barratt have been selling homes that have been built in the second phase of work here.

The properties at Locksbridge Park have been designed with modern living in mind and finished them to a high specification. Thoughtful design has been used to create adaptable layouts allowing occupants to use the spaces available to suit your lifestyle. So whether you need more room to entertain friends and family or for the kids to play, your new home will offer you lots of flexibility. Depending on when you reserve there are options for you to customise your home before you move in, from adding fitting wardrobes to choosing your carpets or flooring.

The village of Picket Piece to the east of Andover has a wonderful community spirit. There are several reputable schools nearby, two large supermarkets offering plenty of choice, smaller independent retailers, a Post Office, Village Hall and family owned pub and restaurant available locally.

In South Wales Barratt's Riverview @ Jubilee Park in Rogerstone offers superbly designed new homes are perfect for those who are looking to retire or have young families. Riverview @ Jubilee Park is also within the catchment area of Bassaleg Comprehensive School.

At this development Barratt have placed a great emphasis on designing the very best homes and communities to suit all lifestyles. Their award-winning designers consider every aspect of the new homes, from internal and external layouts, colour schemes, landscaping and lighting, to the character and identity of your new neighbourhood.

Those buying a new home here can be sure that they are investing in a home designed and built to the highest quality standards and the properties are covered by the 10 year structural warranty, plus a 2 year fixtures and fittings warranty on virtually all homes.

Barratt have a second development to offer in South Wales. Reflections @ The Quays is an exciting new development in the coastal town of Barry. Overlooking the historic docklands, Reflections @ The Quays offers a selection of two, three and four bedroom homes ideal for first time buyers and growing families.

motive8 and Barratt Homes bring healthier lifestyles to residents across the UK

motive8 is a market leader in the design and installation of residential and corporate health and fitness facilities. With over 15 years' experience in the industry, they have completed more than 220 projects, with over 45 of those specifically for divisions of Barratt Homes.

Their market-leading Gym & Spa consultancy specialises in the design, supply, equipment installation, maintenance and management of gym and spa facilities throughout the UK & Europe.

motive8's Managing Director, Nick Sadler, says: "motive8 is committed to delivering the highest quality bespoke health and fitness solutions to customers around the globe. We have worked with Barratt Homes on many schemes to create inspirational and functional facilities. We aim to provide facilities and services that create a comfortable environment within which people can achieve their goals and improve their quality of life."

motive8 offers a complete service and prides itself on its reputation for quality delivery and outstanding service, bringing health & fitness to all its customers. Past projects have included bespoke home gyms, private training studios, spas, swimming pools and large-scale corporate and residential facilities.

A key benefit of the motive8 service is their ability to produce both 2D and 3D renders in-house. This enables them to turn projects around at a much faster rate as well as providing clients with a realistic impression of their finished facility prior to project commencement.

motive8 has been working with Barratt Homes since 2004, when they installed a bespoke gym facility into the acclaimed Brewery Wharf development in Leeds. Since then the relationship has continued to prosper, with motive8 having installed facilities for a number of Barratt divisions throughout the UK.

Once such scheme is Great West Quarter (GWQ) in Brentford, where the Barratt West London head offices are also located. Combining striking art deco renovations with impressive new build structures, the development now features two residents-only facilities, each located in different phases and serving hundreds of residents.

2016 has continued the theme, with a number of new schemes completing across London. Most recently, we installed Nine Elms Point in Vauxhall – a fantastic double-height facility, featuring the latest Technogym interactive cardio machines, a full suite of strength and resistance equipment and a separate studio on the mezzanine level for functional workouts and personal training sessions. This was followed swiftly by Fulham Riverside in July, with another two facilities due to be completed before the end of the year. All these schemes called for extremely bespoke designs to exceed the expectations of these high value developments. motive8 has been able to deliver on every level, meeting both expectations and budget requirements.

In East London, the Barratt division for which motive8 has installed the most facilities, a few schemes stand out in particular. Maple Quays in Canada Water is a fantastic, light, bright and spacious gym offering its residents a full suite of cardiovascular, strength, resistance and core workout stations. The gym has proved so popular that additional equipment has been added since the original launch.

Waterside Park is a further example of an inspiring workout space that has been created using distinct areas and motivational interior design. The Olympic-themed interior sits alongside different floor finishes and a fantastic selection of equipment to provide residents with an all-inclusive workout environment on their doorstep.

Further afield, motive8 has collaborated with Barratt Homes on a scheme called Honeycombe Chine on Boscombe Beach. With a beautiful beachfront location, the gym overlooks the sea, offering its users an unparalleled view whilst they workout.
