

Press Release

Top Safety Accreditation for motive8 Limited

London, UK – 08 August 2016: motive8 has once again been awarded accreditation from Safecontractor for its commitment to achieving excellence in health and safety.

Safecontractor is a leading third party accreditation scheme which recognises very high standards in health and safety management amongst UK contractors.

motive8's application for Safecontractor accreditation was driven by the need for a uniform standard across the business.

motive8's Director of Commercial Operations, Omar White, said: "We are continually striving to bring a uniformity of standards across the business that set a benchmark for the high levels of health and safety and customer service we are striving to achieve. Our Safecontractor accreditation is just one of the many ways we are offering our clients peace of mind that motive8 is a reputable and trusted company to work with."

Safecontractor accreditation will enhance motive8's ability to attract new contracts and its commitment to safety will be viewed positively by its insurers when the company liability policy is up for renewal.

Safecontractor is applicable to most sectors although it is particularly relevant to food manufacture, property, facilities management, retail and leisure sectors, all of which are big users of contracted services.

John Kinge, Technical Director of Safecontractor said, "Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place."

"More companies need to understand the importance of adopting good risk management in the way that motive8 has done. The firm's high standard has set an example which hopefully will be followed by other companies within the sector.

"Safecontractor plays a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process."

Under the Safecontractor scheme, businesses undergo a vetting process which examines health and safety procedures and their track record for safe practice. Those companies meeting

the high standard are included on a database, which is accessible to registered users only via a website.

Client-organisations who sign up to the scheme can access the database, enabling them to vet potential contractors before they even set foot on site. These clients agree that, as users of the scheme, they will engage only those who have received accreditation.

Over 210 major, nation-wide businesses, from several key sectors, have signed up to use the scheme when selecting contractors for services such as building, cleaning, maintenance, refurbishment or electrical and mechanical work.
